PolyBrite International Participates in the Capital Hill Business Fly-In Led by the Clean Energy Works Campaign

Business Leaders Meet with Members of Congress

NAPERVILLE, IL. – February 10, 2010 –PolyBrite International, Inc. manufacturer and creator of environmentally sustainable Borealis LED Lamps and Lighting Systems announced today that PolyBrite participated and met with members of the Congress in Washington DC on February 2-3, 2010. Entrepreneurs, business leaders and investors who support strong climate and clean energy legislation met with members of Congress to illustrate the importance of a strong limit of carbon emissions and the affect it has on future investments and job growth within the United States. The delegation stressed the urgent need for comprehensive climate and clean energy legislation to restore our countries technologically edge.

“The role of energy efficiency in reducing our dependence on foreign oil cannot be underestimated, and if we can accomplish this with clean energy, then we’ve hit a home run.” said Carl Scianna, President and CEO of PolyBrite International. Mr. Scianna further noted that “A clear example of this lies in our country’s decision to ban incandescent lights by 2012, which has obviously accelerated the development of LED lighting systems, itself an outcome of American innovation.” “Our government’s leadership is critical at this juncture in ensuring that we win the race to migrate this LED technology to full commercialization, leading to the revitalization of the manufacturing sector.”

The Business Fly-In was a collaborative effort between various business coalitions and led by the Clean Energy Works Campaign. Participants headed to Washington, DC to say limits on carbon emissions are fundamental to create the kind of long-term market signal for widespread investment in clean energy technologies and the jobs that will follow as a result. These leaders offered the U.S. Senate a unique perspective on how a carbon cap would spur economic growth and create homegrown jobs within their states and nationwide.

BOREALIS® LIGHTING
